

# New Corrugated Cartons only from EMD Chemicals

100% Recyclable Corrugated Cardboard  
Rugged Construction  
Patented Honeycomb Design  
Environmentally Friendly  
Folds Flat for Easy Storage  
Reduces Packaging Waste and Handling Costs

Now available for most high purity solvents and reagent grade solvents. EMD Chemicals is now shipping solvents in a revolutionary new case carton constructed entirely of corrugated cardboard. EMD Chemicals' exclusive honeycomb design allows for the replacement of those cumbersome EPS (expanded polystyrene) or foam inserts with specially engineered cardboard inserts. The new inserts provide superior protection to each solvent bottle within the carton.

Unlike foam inserts, which are bulky and difficult to store, the honeycomb inserts can be flattened along with the outer carton for easy handling, storage and disposal. The entire carton, inside and out, is completely recyclable as cardboard waste. You can now eliminate the hassle and the cost of the disposal of foam inserts, which is estimated at 13 cents per solvent bottle.

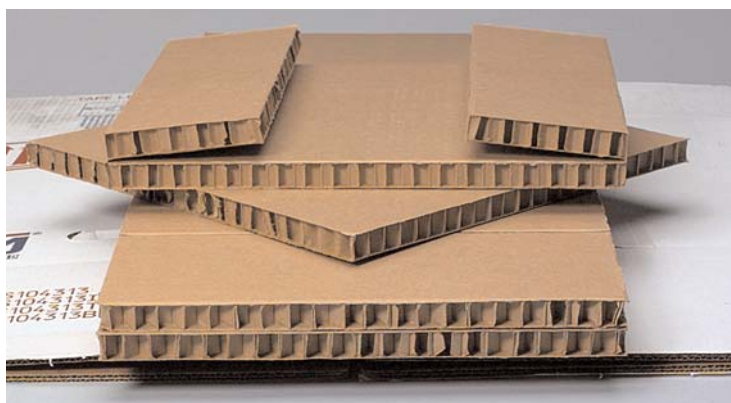

## Solvents packaged in this new carton:

OmniSolv<sup>®</sup> High Purity Solvents  
GR ACS Grade Solvents  
Histology/General Application Grade Solvents  
Technical and Purified Solvents

*Items currently excluded from new packaging:*
