Tag style changes

With the update to RFID tags, the style of tag has also changed.

Old tag types

The new tags will no long have a color or number distinction between funding types. Instead, funding will be determined by using the Asset Management System.

Non-tag numbers

7-series
8-series

New tag types

Flag tags will be used to tag servers, including those that were previously considered untaggable. Any assets still untaggable will be assigned a new non-tag series number, beginning with N.

Sponsor owned tags will remain red and will be clearly labeled as sponsor owned.

*These tags are an exception and do not pertain to many departments.
